EDUCATION

AISSMS Institute of Information Technology, Pune
Bachelor of Technology in Information Technology

2022 - Present
CGPA: 8.66/10

EXPERIENCE

EasyLearning — Frontend Development Intern

June 2025 – August 2025

- Engineered a **password-less Email-OTP authentication system** using **TanStack Router guards**, **Axios interceptors**, and **secure JWT cookies**, eliminating passwords and enabling secure instant access.
- Built a LaTeX-enabled **test attempt engine** with MathJax rendering and real-time answer tracking, actively **used by real students and teachers** in a live learning environment.

PROJECTS

AI Codebase Assistant — RAG, FastAPI, LangChain, FAISS, VoyageAI

[Visit](#)

- Developed an **AI Codebase Assistant** enabling developers to **query repositories in natural language** to enable natural language querying of repositories, significantly reducing code navigation time.
- Implemented a **RAG pipeline** using **VoyageAI embeddings**, **FAISS vector search**, and **LangChain** to semantically index and retrieve multi-language source files (Python, JS, Java).
- Built a **full-stack React and FastAPI** application to automate repository cloning and provide an interactive interface for tracing logic flow and functionality.

MockHire — VAPI AI, OpenAI api, Next.js, TypeScript, PostgreSQL

[GitHub](#) | [IEEE Xplore](#)

- Developed an **AI-powered mock interview platform** with real-time voice interaction and adaptive questioning to simulate realistic technical recruitment scenarios.
- Engineered a **multi-stage AI pipeline** for automated resume parsing and context-aware feedback, generating detailed categorical performance scorecards.
- Authored the research paper **Mockhire: Adaptive Interview Training Through Objective AI Assessment** successfully published in **IEEE Xplore**.

EatWise — React, Node.js, Express, PostgreSQL, Tesseract.js, GROQ API

[Visit](#)

- Built an **AI-powered food safety analyzer** tested on **20+ real food product labels**, enabling users to detect harmful or allergen ingredients from uploaded packaging images.
- Integrated Tesseract.js OCR with GROQ-powered AI analysis to automate ingredient extraction and safety classification, eliminating manual verification entirely.
- Designed a PostgreSQL-backed system with JWT-based sign-in/sign-up authentication to protect user data, persist analysis history, and enable repeatable food safety evaluations per user.

TECHNICAL SKILLS

Programming Languages Java, Python, SQL, Javascript, HTML, CSS

Frameworks & Libraries React.js, Tailwind CSS, Node.js, Shadcn UI, Git/GitHub, Postman, Docker

Databases & Cloud MySQL, PostgreSQL, AWS (EC2, S3)

AI / GenAI & Tools RAG, Prompt Engineering, Langchain, FAISS, OCR (Tesseract.js), Voice AI Integration

CERTIFICATIONS ACHIEVEMENTS

- 3rd Rank** in T.Y.B.Tech Information Technology for academic excellence in IT department.
- OCI 2025 GenAI Professional** – LLMs, RAG pipelines, and OCI AI services [\[Certificate\]](#).
- Azure AI Fundamentals (AI-900)** – NLP, Computer Vision, and Azure AI services [\[Certificate\]](#).
- Azure Data Fundamentals (DP-900)** – Core data concepts and Azure data services [\[Certificate\]](#).
- AWS Academy Graduate** – Cloud Foundations, core services, and security fundamentals [\[Certificate\]](#).
