EDUCATION

AISSMS Institute of Information Technology, Pune
Bachelor of Technology in Information Technology

2022 - Present
CGPA: 8.66/10

EXPERIENCE

EasyLearning — Frontend Development Intern

June 2025 – August 2025

- Engineered a **password-less Email-OTP authentication system** using **TanStack Router guards, Axios interceptors, and secure JWT cookies**, eliminating passwords and enabling secure instant access.
- Built a LaTeX-enabled **test attempt engine** with MathJax rendering and real-time answer tracking, actively **used by real students and teachers** in a live learning environment.

PROJECTS

AI Codebase Assistant — RAG, FastAPI, LangChain, FAISS, VoyageAI

[Visit](#)

- Developed an **AI-powered codebase assistant** enabling developers to **query repositories in natural language** and quickly understand project structure.
- Implemented a **RAG pipeline** using **VoyageAI embeddings, FAISS vector search, and LangChain text chunking** to semantically index repositories of up to 50 source files.
- Built an interactive React interface allowing developers to **explore modules, trace functionality, and navigate unfamiliar codebases** without manual file-by-file reading.

EatWise — React, Node.js, Express, PostgreSQL, Tesseract.js, GROQ API

[Visit](#)

- Built an **AI-powered food safety analyzer** tested on **20+ real food product labels**, enabling users to detect harmful or allergen ingredients from uploaded packaging images.
- Integrated Tesseract.js OCR with GROQ-powered AI analysis to automate ingredient extraction and safety classification, eliminating manual verification entirely.
- Designed a **PostgreSQL-backed system with JWT-based sign-in/sign-up authentication** to protect user data, persist analysis history, and enable repeatable food safety evaluations per user.

JeevanAI — Next.js, React, Typescript, Tailwind CSS, GROQ API, jsPDF

[Visit](#)

- Developed an **AI-powered health assistant** that analyzes user-reported symptoms and delivers **context-aware health insights**, improving accessibility to preliminary medical information.
- Engineered structured prompts using GROQ API to generate accurate, context-specific responses covering **possible diagnoses and actionable recommendations**.
- Enabled users to generate and download multi-section PDF medical reports (diagnosis + recommendations) via jsPDF for easy sharing with healthcare providers.

TECHNICAL SKILLS

Programming Languages	Java, Python, SQL, Javascript, Typescript HTML, CSS
Frameworks & Libraries	React.js, Tailwind CSS, Redux, Node.js, Shaden UI, Git/GitHub, Postman, Docker
Databases & Cloud	MySQL, PostgreSQL, Firebase, AWS (EC2, S3)
AI / GenAI & Tools	RAG, Prompt Engineering, Langchain, FAISS, OCR (Tesseract.js)

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** – Demonstrated knowledge of Generative AI concepts, LLMs, OCI AI services, and responsible AI practices. [\[Certificate\]](#)
- Microsoft Certified: Azure AI Fundamentals (AI-900)** – Acquired knowledge of AI concepts and Azure services including NLP, Computer Vision, and Responsible AI. [\[Certificate\]](#)
- Microsoft Certified: Azure Data Fundamentals (DP-900)** – Validated understanding of core data concepts, relational and non-relational data, and Azure data services. [\[Certificate\]](#)
- AWS Academy Graduate** - Cloud Foundations, AWS core services, security fundamentals. [\[Certificate\]](#)
